

## **COVID-19 Health and Safety Guidelines**

*Updated November 2022 and in effect until further notice*

We know the value of connecting in person, and NMFTA is committed to ensuring the safety of all who attend our meetings and events. We will follow all federal and local guidelines to ensure a safe conference. The CDC and experts are helping people better understand their COVID risk and what actions to take if [exposed](#). Given these updates, we are offering new options for meeting COVID safety guidelines outlined below.

The 2022 Digital Solutions Conference on Cybersecurity does not have a mask mandate, nor are attendees required to provide proof of vaccination or a negative COVID-19 test. Masks are optional for attendees. If wearing a mask will make you feel more comfortable while attending the conference, please do so.

For those traveling, please adhere to transportation mandates in airports, during air travel, and while on public modes of transportation.

We strongly encourage you to understand your risks according to [CDC Guidelines](#) prior to attending. We also recommend you familiarize yourself with the [Westin Old Town's COVID Policy](#), which includes enhanced cleaning protocols.

NMFTA will update all meeting attendees if current safety requirements change. Masks will be available upon request. Compliance with general CDC safety guidelines will help to protect everyone participating in NMFTA events. Thank you in advance for your cooperation and consideration of fellow attendees.
