Analysis

**Introduction**

Ninety items in the Paper Articles Group, as shown in the Present Classification Provisions herein, name particular types of paper products, and these provisions can be difficult to interpret, apply, or verify.

**SUBJECT 73****Transportation Characteristics**

**Handling, Stowability, and Liability**—There have been no reports of unusual or significant handling, stowability, or liability issues. Therefore, density has been identified as the primary transportation characteristic.

**Conclusion**

Based on the foregoing analysis, the involved articles do not present any unusual or significant handling, stowing, or liability issues, and density has been determined to be the primary transportation characteristic.

Therefore, eighty-nine items subject to the Paper Articles Group would be canceled with reference to item 153900. Concurrently, item 153900 would be modified to provide classes predicated on the FCDC's standard 13-subprovision density scale<sup>70</sup>, and the description would be amended. Additionally, item 154380 would be canceled as obsolete.

Furthermore, twelve Notes would be canceled with no further application, and fourteen Notes would be canceled and reestablished as new Notes attendant to item 153900 to clarify the application of the articles within the "viz."

The FCDC's Packaging Development Manager has reviewed the proposed minimum packaging requirements and determined they are appropriate for the LTL environment.

---

<sup>70</sup> The FCDC's standard 13-subprovision density scale includes reference to Item (Rule) 170, the inadvertence clause.
