Subject X: Building Woodwork Group

Quick View: Twenty-two items subject to the Building Woodwork Group are canceled with reference to a new item, naming “Building Woodwork” with a “viz.” format and classes predicated on the FCDC’s 13-subprovision density scale.

- Three items canceled with reference to items elsewhere in the Classification
- Four Notes canceled with no further application
- Three Notes canceled and reestablished as new Notes attendant to the new item
- One new Note established attendant to the new item

	BUILDING WOODWORK GROUP: subject to item 37500	
⇒B-NEW	NOTE—Ornamental bases or capitals must be in boxes or crates.	
⇒C-NEW	NOTE—Trellises or trelliswork configured as lawn or garden arbors, arches or pergolas, including unassembled units or kits, are classified as such in item 33610.	
⇒D-NEW	NOTE—Applies only on articles to be built in and become a permanent part of building woodwork or ships' woodwork.	

Analysis**Introduction**

There are numerous items subject to the Building Woodwork Group that name particular types of building woodwork, and these provisions can be difficult to interpret, apply, or verify.

Transportation Characteristics

Handling, Stowability, and Liability—There have been no reports of unusual or significant handling, stowability, or liability issues. Therefore, density has been identified as the primary transportation characteristic.

Conclusion

Based on the foregoing analysis, the involved articles do not present any unusual or significant handling, stowability, or liability issues and density has been determined to be the primary transportation characteristic.

Therefore, twenty-two items subject to the Building Woodwork Group would be canceled with reference to a new item naming “Building Woodwork” with a “viz.” format. The new item would provide classes predicated on the FCDC’s standard 13-subprovision density scale¹. Three items would be canceled with reference to items elsewhere in the Classification.

Furthermore, four Notes would be canceled with no further application, and three Notes would be canceled and reestablished as new Notes attendant to the new item to clarify the application of the articles within the “viz.” A new Note would also be established attendant to the new item to provide additional packaging requirements.

¹ The FCDC’s standard 13-subprovision density scale includes reference to Item (Rule) 170, the inadvertence clause.

SUBJECT XX

The FCDC's Lead Classification and Packaging Analyst has reviewed the proposed minimum packaging requirements and determined they are appropriate for the LTL environment.
